=====

[Install]

Double click the file:

setup.exe

and run it according to the instructions in the program.

This software uses Microsoft .NET Framework 2.0 Service Pack 1 or later.
If the .NET Framework 2.0 Service Pack 1 or later is not installed on your PC
.NET Framework 2.0 Service Pack 1 or later will be downloaded from the Microsoft
web site, and installed before setup.

If the .NET Framework 2.0 Service Pack 1 or later is not installed on your PC
and your PC is not connected to internet, run the file:

NetFx20SP1_x86.exe

saved on this CD first, and then run the file setup.exe.

[Uninstall]

Select My Computer and open the Control Panel.
Select the Add/Remove Programs applet and select TemCurve Lite and press
Delete button.
